Soil for Building Materials (Science of Soil) Rebecca Steffoff

Soil is something we don't just live on, it's something we live in. Throughout history, mankind has developed ways of using soil to build dwellings. The ancients built cities out of bricks, the Native Americans of the Southwest used soil to build adobe settlements, and the pioneers on the prairies built sod homes to combat heat and cold. This book examines the properties of different kinds of soil and what makes that soil useful for building a structure.
