**Computer Intensive Methods in Control and Signal Processing: The Curse of Dimensionality** Kevin Warwick, Miroslav Karny

Due to the rapid increase in readily available computing power, a corresponding increase in the complexity of problems being tackled has occurred in the field of systems as a whole. A plethora of new methods which can be used on the problems has also arisen with a constant desire to deal with more and more difficult applications. Unfortunately by increasing the accuracy in models employed along with the use of appropriate algorithms with related features, the resultant necessary computations can often be of very high dimension. This brings with it a whole new breed of problem which has come to be known as "The Curse of Dimensionality". The expression "Curse of Dimensionality" can be in fact traced back to Richard Bellman in the 1960's. However, it is only in the last few years that it has taken on a widespread practical significance although the term dimensionality does not have a unique precise meaning and is being used in a slightly different way in the context of algorithmic and stochastic complexity theory or in every day engineering. In principle the dimensionality of a problem depends on three factors: on the engineering system (subject), on the concrete task to be solved and on the available resources. A system is of high dimension if it contains a lot of elements/variables and/or the relationship/connection between the elements/variables is complicated.

### **From reader reviews:**

#### **Luis Vargas:**

Book is usually written, printed, or highlighted for everything. You can realize everything you want by a e-book. Book has a different type. As we know that book is important issue to bring us around the world. Adjacent to that you can your reading ability was fluently. A reserve Computer Intensive Methods in Control and Signal Processing: The Curse of Dimensionality will make you to always be smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think this open or reading a new book make you bored. It is far from make you fun. Why they may be thought like that? Have you searching for best book or appropriate book with you?

#### **Armando Rodgers:**

In this 21st millennium, people become competitive in most way. By being competitive today, people have do something to make all of them survives, being in the middle of the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated this for a while is reading. That's why, by reading a publication your ability to survive raise then having chance to stay than other is high. For you personally who want to start reading any book, we give you this Computer Intensive Methods in Control and Signal Processing: The Curse of Dimensionality book as beginning and daily reading guide. Why, because this book is greater than just a book.

#### **Lisa Bentley:**

A lot of book has printed but it takes a different approach. You can get it by net on social media. You can choose the very best book for you, science, comedian, novel, or whatever by searching from it. It is referred to as of book Computer Intensive Methods in Control and Signal Processing: The Curse of Dimensionality. You can include your knowledge by it. Without leaving behind the printed book, it may add your knowledge and make a person happier to read. It is most crucial that, you must aware about publication. It can bring you from one spot to other place.

#### **Victor Havens:**

What is your hobby? Have you heard that will question when you got students? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you know that little person such as reading or as looking at become their hobby. You should know that reading is very important as well as book as to be the point. Book is important thing to increase you knowledge, except your current teacher or lecturer. You see good news or update regarding something by book. Numerous books that can you go onto be your object. One of them is Computer Intensive Methods in Control and Signal Processing: The Curse of Dimensionality.
