The chemical sector is a key part of the national economy and has been designated by the Department of Homeland Security (DHS) as one of 17 sectors comprising the nation's Critical Infrastructure. Although its products represent only 2 percent of the U.S. gross domestic product, those products underpin most other manufactured goods. To assist DHS in characterizing and mitigating the vulnerabilities faced by the nation from the chemical industry, this study examines classes of chemicals and chemical processes that are critical to the nation's security, economy, and health. It identifies vulnerabilities and points of weakness in the supply chain for these chemicals and chemical processes; assesses the likely impact of a significant disruption in the supply chain; identifies actions to help prevent disruption in the supply chain and mitigate loss and injury should such disruption occur; identifies incentives and disincentives to preventative and mitigating actions; and recommends areas of scientific, engineering, and economic research and development. The report concludes that the consequences of a deliberate attack on the chemical infrastructure would be expected to be similar in nature to the accidents we have already experienced. Under limited circumstances, such an attack could cause catastrophic casualties and loss of life, but it would take several simultaneous events to cause catastrophic economic consequences. Poor communication could amplify societal response. Overall, the recommendations in this report emphasize the benefit of investments to improve emergency preparedness for and response to chemical events. They also highlight the potential to minimize the physical hazards through development of cost-effective, safer processes that reduce the volume, toxicity, or hazardous conditions under which chemicals are processed.

From reader reviews:

Elias Rosser:

This Terrorism and the Chemical Infrastructure: Protecting People and Reducing Vulnerabilities book is not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is actually information inside this book incredible fresh, you will get details which is getting deeper a person read a lot of information you will get. This kind of Terrorism and the Chemical Infrastructure: Protecting People and Reducing Vulnerabilities without we understand teach the one who reading through it become critical in contemplating and analyzing. Don't always be worry Terrorism and the Chemical Infrastructure: Protecting People and Reducing Vulnerabilities can bring any time you are and not make your carrier space or bookshelves' come to be full because you can have it in the lovely laptop even cell phone. This Terrorism and the Chemical Infrastructure: Protecting People and Reducing Vulnerabilities having great arrangement in word and also layout, so you will not truly feel uninterested in reading.

Solomon Pepper:

Spent a free the perfect time to be fun activity to do! A lot of people spent their down time with their family, or their particular friends. Usually they doing activity like watching television, about to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Might be reading a book can be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try out look for book, may be the e-book untitled Terrorism and the Chemical Infrastructure: Protecting People and Reducing Vulnerabilities can be fine book to read. May be it is usually best activity to you.

Charles Smith:

Are you kind of active person, only have 10 or 15 minute in your day time to upgrading your mind skill or thinking skill even analytical thinking? Then you are having problem with the book when compared with can satisfy your small amount of time to read it because all of this time you only find guide that need more time to be go through. Terrorism and the Chemical Infrastructure: Protecting People and Reducing Vulnerabilities can be your answer as it can be read by an individual who have those short free time problems.

Duane Vega:

A lot of people said that they feel fed up when they reading a book. They are directly felt that when they get a half elements of the book. You can choose the book Terrorism and the Chemical Infrastructure: Protecting People and Reducing Vulnerabilities to make your own reading is interesting. Your personal skill of reading proficiency is developing when you including reading. Try to choose very simple book to make you enjoy to study it and mingle the idea about book and studying especially. It is to be first opinion for you to like to open a book and examine it. Beside that the e-book Terrorism and the Chemical Infrastructure: Protecting

People and Reducing Vulnerabilities can to be your brand-new friend when you're experience alone and confuse with the information must you're doing of their time.
