Introducing Delphi: Theory Through Practice John Barrow, Helene Gelderblom, Linda Miller
This self-study book introduces practical programming in Delphi and important programming theory. The guide is structured to help students progress at their own pace through practical examples and activities. The activities appear first as main activities. Subactivities and their solutions then provide step-by-step guidance for those students finding it difficult to solve the main activities the first time around. After this practical grounding the book presents the appropriate underlying theory to ensure that the student has a fully rounded understanding. Little previous experience with computers is necessary - if you use a word processor or spreadsheet, or enjoy surfing the Internet and want to learn about programming, this is the book for you!
