Analyzing Ecological Data (Statistics for Biology and Health)

Alain Zuur, Elena N. Ieno, Graham M. Smith

Analyzing Ecological Data (Statistics for Biology and Health) Alain Zuur, Elena N. Ieno, Graham M. Smith

This book provides a practical introduction to analyzing ecological data using real data sets. The first part gives a largely non-mathematical introduction to data exploration, univariate methods (including GAM and mixed modeling techniques), multivariate analysis, time series analysis, and spatial statistics. The second part provides 17 case studies. The case studies include topics ranging from terrestrial ecology to marine biology and can be used as a template for a reader's own data analysis. Data from all case studies are available from www.highstat.com. Guidance on software is provided in the book.

From reader reviews:

Jon Farris:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to know everything in the world. Each guide has different aim or perhaps goal; it means that reserve has different type. Some people feel enjoy to spend their a chance to read a book. They may be reading whatever they consider because their hobby is reading a book. How about the person who don't like looking at a book? Sometime, individual feel need book whenever they found difficult problem or maybe exercise. Well, probably you will need this Analyzing Ecological Data (Statistics for Biology and Health).

Glory Ruiz:

A lot of people always spent their free time to vacation or go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent they free time just watching TV, as well as playing video games all day long. If you would like try to find a new activity this is look different you can read a new book. It is really fun for you personally. If you enjoy the book that you just read you can spent the entire day to reading a reserve. The book Analyzing Ecological Data (Statistics for Biology and Health) it is quite good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. Should you did not have enough space bringing this book you can buy the e-book. You can m0ore simply to read this book from your smart phone. The price is not to fund but this book provides high quality.

Kari Hughes:

People live in this new moment of lifestyle always aim to and must have the free time or they will get wide range of stress from both daily life and work. So , if we ask do people have free time, we will say absolutely yes. People is human not really a robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer will probably unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative within spending your spare time, the book you have read is actually Analyzing Ecological Data (Statistics for Biology and Health).

Stephanie Landa:

This Analyzing Ecological Data (Statistics for Biology and Health) is great guide for you because the content which is full of information for you who also always deal with world and get to make decision every minute. This kind of book reveal it facts accurately using great arrange word or we can claim no rambling sentences in it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only offers you straight forward sentences but tough core information with wonderful delivering sentences. Having Analyzing Ecological Data (Statistics for Biology and Health) in your hand like getting the world in your arm, info in it is not ridiculous 1. We can say that no book that offer you world with ten or fifteen second right but this e-book already do that. So , this really is good reading book. Hi Mr. and Mrs. hectic do you still doubt which?
