Artificial Intelligence Techniques for Rational Decision Making (Advanced Information and Knowledge Processing)

Tshilidzi Marwala

Artificial Intelligence Techniques for Rational Decision Making (Advanced Information and Knowledge Processing) Tshilidzi Marwala

Develops insights into solving complex problems in engineering, biomedical sciences, social science and economics based on artificial intelligence. Some of the problems studied are in interstate conflict, credit scoring, breast cancer diagnosis, condition monitoring, wine testing, image processing and optical character recognition. The author discusses and applies the concept of flexibly-bounded rationality which prescribes that the bounds in Nobel Laureate Herbert Simon's bounded rationality theory are flexible due to advanced signal processing techniques, Moore's Law and artificial intelligence.

Artificial Intelligence Techniques for Rational Decision Making examines and defines the concepts of causal and correlation machines and applies the transmission theory of causality as a defining factor that distinguishes causality from correlation. It develops the theory of rational counterfactuals which are defined as counterfactuals that are intended to maximize the attainment of a particular goal within the context of a bounded rational decision making process. Furthermore, it studies four methods for dealing with irrelevant information in decision making:

- Theory of the marginalization of irrelevant information
- Principal component analysis
- Independent component analysis
- Automatic relevance determination method

In addition it studies the concept of group decision making and various ways of effecting group decision making within the context of artificial intelligence.

Rich in methods of artificial intelligence including rough sets, neural networks, support vector machines, genetic algorithms, particle swarm optimization, simulated annealing, incremental learning and fuzzy networks, this book will be welcomed by researchers and students working in these areas.

From reader reviews:

Marie Gambino:

The reserve untitled Artificial Intelligence Techniques for Rational Decision Making (Advanced Information and Knowledge Processing) is the e-book that recommended to you you just read. You can see the quality of the publication content that will be shown to you. The language that publisher use to explained their way of doing something is easily to understand. The copy writer was did a lot of study when write the book, so the information that they share for your requirements is absolutely accurate. You also could get the e-book of Artificial Intelligence Techniques for Rational Decision Making (Advanced Information and Knowledge Processing) from the publisher to make you much more enjoy free time.

Owen Ray:

Reading a book to be new life style in this yr; every people loves to study a book. When you examine a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what types of book that you have read. In order to get information about your study, you can read education books, but if you want to entertain yourself you can read a fiction books, this sort of us novel, comics, as well as soon. The Artificial Intelligence Techniques for Rational Decision Making (Advanced Information and Knowledge Processing) provide you with new experience in examining a book.

Virginia Villalon:

That book can make you to feel relax. This specific book Artificial Intelligence Techniques for Rational Decision Making (Advanced Information and Knowledge Processing) was bright colored and of course has pictures on the website. As we know that book Artificial Intelligence Techniques for Rational Decision Making (Advanced Information and Knowledge Processing) has many kinds or category. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore , not at all of book are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you and try to like reading which.

Richard Diller:

As a student exactly feel bored in order to reading. If their teacher asked them to go to the library or make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their passion. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that reading is not important, boring and also can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Artificial Intelligence Techniques for Rational Decision Making (Advanced Information and Knowledge Processing) can make you sense more interested to read.
