Evolutionary Optimization (International Series in Operations Research & Management Science)

Evolutionary Optimization (International Series in Operations Research & Management Science)

Evolutionary computation techniques have attracted increasing attention in recent years for solving complex optimization problems. They are more robust than traditional methods based on formal logics or mathematical programming for many real world OR/MS problems. Evolutionary computation techniques can deal with complex optimization problems better than traditional optimization techniques. However, most papers on the application of evolutionary computation techniques to Operations Research /Management Science (OR/MS) problems have scattered around in different journals and conference proceedings. They also tend to focus on a very special and narrow topic. It is the right time that an archival book series publishes a special volume which includes critical reviews of the state-of-art of those evolutionary computation techniques which have been found particularly useful for OR/MS problems, and a collection of papers which represent the latest development in tackling various OR/MS problems by evolutionary computation techniques. This special volume of the book series on Evolutionary Optimization aims at filling in this gap in the current literature. The special volume consists of invited papers written by leading researchers in the field. All papers were peer reviewed by at least two recognised reviewers. The book covers the foundation as well as the practical side of evolutionary optimization.

From reader reviews:

Darlene Trevino:

With other case, little persons like to read book Evolutionary Optimization (International Series in Operations Research & Management Science). You can choose the best book if you love reading a book. So long as we know about how is important a new book Evolutionary Optimization (International Series in Operations Research & Management Science). You can add information and of course you can around the world by a book. Absolutely right, because from book you can learn everything! From your country until finally foreign or abroad you will find yourself known. About simple matter until wonderful thing you may know that. In this era, we are able to open a book or searching by internet gadget. It is called e-book. You can use it when you feel bored stiff to go to the library. Let's learn.

Jack Crawford:

As people who live in the modest era should be update about what going on or data even knowledge to make these individuals keep up with the era which is always change and advance. Some of you maybe will update themselves by looking at books. It is a good choice to suit your needs but the problems coming to you actually is you don't know what kind you should start with. This Evolutionary Optimization (International Series in Operations Research & Management Science) is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Lou Marshall:

A lot of people always spent their free time to vacation or maybe go to the outside with them family members or their friend. Were you aware? Many a lot of people spent they will free time just watching TV, or even playing video games all day long. If you would like try to find a new activity honestly, that is look different you can read a new book. It is really fun to suit your needs. If you enjoy the book that you simply read you can spent all day long to reading a book. The book Evolutionary Optimization (International Series in Operations Research & Management Science) it doesn't matter what good to read. There are a lot of those who recommended this book. These were enjoying reading this book. If you did not have enough space to create this book you can buy the particular e-book. You can m0ore easily to read this book from your smart phone. The price is not very costly but this book possesses high quality.

Stephen Morgan:

Reserve is one of source of understanding. We can add our information from it. Not only for students but in addition native or citizen require book to know the revise information of year to year. As we know those ebooks have many advantages. Beside we all add our knowledge, can also bring us to around the world. From the book Evolutionary Optimization (International Series in Operations Research & Management Science) we can get more advantage. Don't you to definitely be creative people? To get creative person must choose to read a book. Only choose the best book that ideal with your aim. Don't end up being doubt to

change your life with this book Evolutionary Optimization (International Series in Operations Research & Management Science). You can more pleasing than now.
