## Political Landscapes of Capital Cities

*Political Landscapes of Capital Cities* investigates the processes of transformation of the natural landscape into the culturally constructed and ideologically defined political environments of capital cities. In this spatially inclusive, socially dynamic interpretation, an interdisciplinary group of authors including archaeologists, anthropologists, and art historians uses the methodology put forth in Adam T. Smith's *The Political Landscape: Constellations of Authority in Early Complex Polities* to expose the intimate associations between human-made environments and the natural landscape that accommodate the sociopolitical needs of governmental authority.

*Political Landscapes of Capital Cities* blends the historical, political, and cultural narratives of capital cities such as Bangkok, Cusco, Rome, and Tehran with a careful visual analysis, hinging on the methodological tools of not only architectural and urban design but also cultural, historiographical, and anthropological studies. The collection provides further ways to conceive of how processes of urbanization, monumentalization, ritualization, naturalization, and unification affected capitals differently without losing grasp of local distinctive architectural and spatial features. The essays also articulate the many complex political and ideological agendas of a diverse set of sovereign entities that planned, constructed, displayed, and performed their societal ideals in the spaces of their capitals, ultimately confirming that political authority is profoundly spatial.
