Stochastic Models for Learning

Robert R. Bush, Frederick Mosteller

Stochastic Models for Learning Robert R. Bush, Frederick Mosteller

2012 Reprint of 1955 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. A stochastic process is one in which the probabilities of a set of events keep changing with time. Bush and Mosteller make use of the mathematical techniques developed for the study of such processes in building a theory of learning and then apply the theory to explain the results of several learning experiments. Contents: Part I: The mathematical system and the general model -- 1. The basic model -- 2. Stimulus sampling and conditioning -- 3. Sequences of events -- 4. Distributions of response probabilities -- 5. The equal alpha condition -- 6. Approximate methods -- 7. Operators with limits zero and unity -- 8. Commuting operators -- Part II: Applications -- 9. Identification and estimation -- 10. Free-recall verbal learning -- 11. Avoidance training -- 12. An experiment on imitation -- 13. Symmetric choice problems -- 14. Runway experiments -- 15. Evaluations.

From reader reviews:

Stephanie Cromwell:

This Stochastic Models for Learning usually are reliable for you who want to be a successful person, why. The reason of this Stochastic Models for Learning can be one of many great books you must have is usually giving you more than just simple reading through food but feed anyone with information that maybe will shock your previous knowledge. This book is definitely handy, you can bring it everywhere you go and whenever your conditions in e-book and printed people. Beside that this Stochastic Models for Learning giving you an enormous of experience for example rich vocabulary, giving you test of critical thinking that we understand it useful in your day pastime. So , let's have it and luxuriate in reading.

Karla Walker:

Hey guys, do you wishes to finds a new book to read? May be the book with the subject Stochastic Models for Learning suitable to you? Often the book was written by popular writer in this era. The particular book untitled Stochastic Models for Learning is a single of several books this everyone read now. This book was inspired a number of people in the world. When you read this guide you will enter the new way of measuring that you ever know before. The author explained their concept in the simple way, and so all of people can easily to know the core of this publication. This book will give you a lots of information about this world now. In order to see the represented of the world on this book.

Frank Monroe:

In this age globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Often the book that recommended to you personally is Stochastic Models for Learning this publication consist a lot of the information on the condition of this world now. That book was represented just how can the world has grown up. The language styles that writer use for explain it is easy to understand. The actual writer made some research when he makes this book. Honestly, that is why this book acceptable all of you.

Karen Nash:

In this era which is the greater person or who has ability to do something more are more treasured than other. Do you want to become one of it? It is just simple strategy to have that. What you are related is just spending your time little but quite enough to have a look at some books. Among the books in the top record in your reading list is definitely Stochastic Models for Learning. This book which can be qualified as The Hungry Slopes can get you closer in getting precious person. By looking up and review this reserve you can get many advantages.
