Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights)

Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights)

Swarm Intelligence and bio-inspired computation have become increasingly popular in the last two decades. Bio-inspired algorithms such as ant colony algorithms, bat algorithms, bee algorithms, firefly algorithms, cuckoo search and particle swarm optimization have been applied in almost every area of science and engineering with a dramatic increase in the number of relevant publications. This book reviews the latest developments in swarm intelligence and bio-inspired computation from both the theory and application side, providing a complete resource that analyzes and discusses the latest and future trends in research directions. It can help new researchers to carry out timely research and inspire readers to develop new algorithms. With its impressive breadth and depth, this book will be useful for advanced undergraduate students, PhD students and lecturers in computer science, engineering and science as well as researchers and engineers.

- Focuses on the introduction and analysis of key algorithms
- Includes case studies for real-world applications
- Contains a balance of theory and applications, so readers who are interested in either algorithm or applications will all benefit from this timely book.

From reader reviews:

John Caldwell:

In this 21st hundred years, people become competitive in each and every way. By being competitive now, people have do something to make these people survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated that for a while is reading. Yeah, by reading a publication your ability to survive improve then having chance to stand than other is high. To suit your needs who want to start reading any book, we give you this Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) book as basic and daily reading guide. Why, because this book is greater than just a book.

Ronald Smith:

A lot of people always spent their very own free time to vacation or maybe go to the outside with them family or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity that's look different you can read a new book. It is really fun for you personally. If you enjoy the book which you read you can spent the entire day to reading a publication. The book Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) it doesn't matter what good to read. There are a lot of people who recommended this book. They were enjoying reading this book. If you did not have enough space to create this book you can buy the actual e-book. You can m0ore effortlessly to read this book from a smart phone. The price is not too costly but this book provides high quality.

Beverly Bell:

Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) can be one of your beginner books that are good idea. We recommend that straight away because this publication has good vocabulary that can increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to set every word into delight arrangement in writing Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) yet doesn't forget the main level, giving the reader the hottest and based confirm resource data that maybe you can be certainly one of it. This great information could drawn you into brand-new stage of crucial contemplating.

Michael Mitchell:

In this period of time globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher that print many kinds of book. The particular book that recommended for your requirements is Swarm Intelligence and Bio-Inspired Computation: Theory and

Applications (Elsevier Insights) this book consist a lot of the information on the condition of this world now. This specific book was represented how does the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The particular writer made some research when he makes this book. That's why this book acceptable all of you.
