Evolution 2.0: Breaking the Deadlock Between Darwin and Design

Perry Marshall

Evolution 2.0: Breaking the Deadlock Between Darwin and Design Perry Marshall
Why Almost Everyone Is Wrong about Creation-Evolution (and It's Not Why You Think)

Meet the opponents: In one corner - Proponents of **Intelligent Design** like **William Dembski, Stephen Meyer, and Michael Behe**. Many defy scientific consensus, maintaining evolution is a fraud. And advocates of creationism challenge decades of data in several branches of science: biology, chemistry, genetics, paleontology.

In the other corner - **Devout Neo-Darwinists** like **Richard Dawkins, Daniel Dennett, and Jerry Coyne**, whose evolutionary theories deny any purpose or plan. Interestingly, their books omit the latest science, glossing over crucial questions and fascinating details.?? What if both sides are half-right?

What if the entire creation evolution debate has deleted important information, both sides clinging to outdated views, theories, and interpretations?

There is a third way. This is the first book to describe the Extended Evolutionary Synthesis in plain English. Evolution 2.0 reveals experiments proving that, while evolution is not a hoax, neither is it random or purposeless. Changes are targeted, adaptive, and aware.

You will discover:

?

-Nearly every cell in your body can edit its own DNA, repairing destructive copying errors, charting a path for its transformation (page 82)

-Genes - far from being set in stone - change and adapt to the environment.

-How germs re-engineer their genetic destiny in real time by borrowing DNA from other organisms (page 94) (it's the reason your doctor tells you to never stop taking antibiotics halfway through your prescribed course)

-How bacteria communicate and organize themselves into armies, staging coordinated attacks on your immune system (page 110)

-Brand new species in 18 months, sometimes 24 hours - Through two empirically proven systems of natural genetic engineering (page 146)

-How and when cells generate new information, yes genes that did not exist before - despite what creationists told you (page 150)

-Why DNA, which is digital instructions, is not merely *like* code but *is* code, same as software on your smartphone is (page 38)

-How cells switch genes on and off in response to the environment, activating new traits that get passed from parents to kids (page 115)

-Many more amazing, scientifically verified facts that advance technology & medicine and fuel our sense of wonder at creation itself.

You will discover **fascinating real-time evolutionary lab experiments** by an eminent scientist in the 1940s, whose work was recognized in 1983 by a **Nobel prize** & US postage stamp, but then... still rarely mentioned in school science curricula.

High priests of scientific establishment actively oppose research that threatens antiquated theories, labeling findings in scientific journals a "media fiasco".

This book explores 70+ years of under-reported evolutionary science. Evolution 2.0 chronicles bestselling author Perry Marshall's 10-year journey of research. As an Electrical Engineer, author of an Ethernet book and renowned business consultant, Marshall connects the dots in a new and refreshing way. He tackles some of the biggest questions about evolution and intelligent design with precision. He makes it clear when conclusions are proven by hard data and when it can only be inferred.

?

This book will open your eyes and transform your thinking about life and evolution vs. creation. You'll gain a deeper appreciation for our place in the universe. You'll see the world around you as never before: adaptive, efficient, and incredibly elegant.

\$3 Million Technology Prize: *Origin of Information* is one of the central problems in modern biology. No one knows where the genetic code came from; no one knows how the first cell developed. To solve this, the author has organized a Private Equity Investment group which is offering a prize, reminiscent of the X-Prize, for a natural process that produces coded information. The prize amount is \$3 million USD as of November 2016. Details in Chapter 23 and Appendix 4.

From reader reviews:

Dorothy Wild:

Book is to be different for each grade. Book for children till adult are different content. We all know that that book is very important normally. The book Evolution 2.0: Breaking the Deadlock Between Darwin and Design has been making you to know about other understanding and of course you can take more information. It is quite advantages for you. The reserve Evolution 2.0: Breaking the Deadlock Between Darwin and Design is not only giving you considerably more new information but also to be your friend when you feel bored. You can spend your own personal spend time to read your publication. Try to make relationship while using book Evolution 2.0: Breaking the Deadlock Between Darwin and Design. You never sense lose out for everything if you read some books.

Gregory Mendoza:

A lot of people always spent their very own free time to vacation or go to the outside with them family or their friend. Were you aware? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity here is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book that you read you can spent 24 hours a day to reading a e-book. The book Evolution 2.0: Breaking the Deadlock Between Darwin and Design it is extremely good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. If you did not have enough space to develop this book you can buy the e-book. You can m0ore very easily to read this book from your smart phone. The price is not very costly but this book offers high quality.

William Hayes:

What is your hobby? Have you heard this question when you got scholars? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every person has different hobby. So you know that little person similar to reading or as reading through become their hobby. You should know that reading is very important and book as to be the issue. Book is important thing to include you knowledge, except your personal teacher or lecturer. You get good news or update with regards to something by book. Different categories of books that can you choose to use be your object. One of them is Evolution 2.0: Breaking the Deadlock Between Darwin and Design.

Donald Ventura:

A number of people said that they feel bored stiff when they reading a publication. They are directly felt this when they get a half portions of the book. You can choose the particular book Evolution 2.0: Breaking the Deadlock Between Darwin and Design to make your own reading is interesting. Your own personal skill of reading proficiency is developing when you like reading. Try to choose very simple book to make you enjoy to read it and mingle the sensation about book and reading through especially. It is to be initial opinion for

you to like to open a book and study it. Beside that the publication Evolution 2.0: Breaking the Deadlock Between Darwin and Design can to be your brand-new friend when you're feel alone and confuse with the information must you're doing of their time.
