This is a NAVAL POSTGRADUATE SCHOOL MONTEREY CA report procured by the Pentagon and made available for public release. It has been reproduced in the best form available to the Pentagon. It is not spiral-bound, but rather assembled with Velobinding in a soft, white linen cover. The Storming Media report number is A923114. The abstract provided by the Pentagon follows: Mines are relatively cheap weapons that can be employed in significant quantity by any country with even a modest military budget, and can be very effective at severely damaging or sinking ships or denying maritime access to an area. In this thesis, simulation and analytical models are formulated and studied to investigate the benefits and risks of mine avoidance, without object classification capability, under circumstances that include imperfect sensors and false targets. Two models of mine avoidance maneuvering are formulated, with increasing complexity in both their analytical and simulation implementations. With both formulations, results are obtained and analyzed to produce tables showing the probability of successful minefield transit as a function of sensor probability of detection vs. density of mine and no-mine, mine-like bottom objects, and the false alarm rate. The tables show the range of those parameter values for which mine avoidance maneuvering improves the probability of safe transit, and the values for which mine avoidance maneuvering reduces the probability of safe transit. The decrease is attributable to the fact that mine avoidance maneuvering increases the distance traveled in the minefield and the consequent risk of damage or destruction by an undetected mine. Quantitative results for the increased distance traveled in the minefield are also presented.

### **From reader reviews:**

#### **Angela Taylor:**

Have you spare time for just a day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the actual Mall. How about open or maybe read a book allowed The Effect of Sensor Performance on Safe Minefield Transit? Maybe it is to be best activity for you. You realize beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have various other opinion?

#### **Fabian Luton:**

Often the book The Effect of Sensor Performance on Safe Minefield Transit has a lot info on it. So when you read this book you can get a lot of help. The book was authored by the very famous author. Mcdougal makes some research previous to write this book. This particular book very easy to read you can obtain the point easily after scanning this book.

#### **Roger Lindsey:**

Reading can called thoughts hangout, why? Because when you are reading a book specifically book entitled The Effect of Sensor Performance on Safe Minefield Transit the mind will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely can be your mind friends. Imaging each and every word written in a reserve then become one application form conclusion and explanation in which maybe you never get just before. The The Effect of Sensor Performance on Safe Minefield Transit giving you another experience more than blown away your brain but also giving you useful facts for your better life within this era. So now let us demonstrate the relaxing pattern this is your body and mind are going to be pleased when you are finished reading it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?

#### **Sharon Brogdon:**

What is your hobby? Have you heard which question when you got pupils? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person similar to reading or as reading become their hobby. You must know that reading is very important and book as to be the issue. Book is important thing to add you knowledge, except your current teacher or lecturer. You discover good news or update in relation to something by book. Many kinds of books that can you choose to use be your object. One of them are these claims The Effect of Sensor Performance on Safe Minefield Transit.
