## **Raising and Teaching Children for their Tomorrows** Albert H. Yee

Why are mental developments during childhood so important to children's futures?' 'The leading premise of this book is that children's early life experiences forever shape their ability to learn, think, and conduct their adult lives.' 'International tests consistently disgrace the schooling and achievement of U.S. students. The public is either unaware of the disaster or hasn't taken it seriously, even though it's equivalent to the catastrophes of Pearl Harbor and 9/11 . . .' According to: Wayne H. Holtzman, PhD, Dean, College of Education (retired), President, Hogg Foundation for Mental Health (retired), The University of Texas at Austin: '(Al's) keen insight into the emotional socialization, learning, and creative thinking of a developing child in our ever-more complex world is indeed impressive. Any parent or teacher could profit from a careful reading of this thought-provoking book.' \* \* \* \* \* Albert Yee (EdD, 1965, Stanford) has served as a distinguished classroom teacher for seven years in California and 30 years as professor of psychology and education and academic dean in America and East Asia. For his outstanding service and original research and publications, he has been elected a Fellow of the American Association for the Advancement of Science, American Psychological Association, American Psychological Society, and Society for the Psychological Study of Social Issues. Al is proud of his children's success and having raised them. His daughter is a surgery professor, specializing in breast cancer, and his son is a State Dept. Foreign Service Officer, whose recent posts have been consul general in Greece and Director, Provisional Reconstruction Teams, in Afghanistan.
