**Understanding Neural Networks** Maureen Caudill, Charles Butler

*Understanding Neural Networks* is a textbook and workbook that provides a unique interactive learning environment. With or without the aid of a classroom instructor, it allows students and other users to learn about neural networks while gaining practical, hands-on experience with all of the leading network models. Each model is presented as realistically as possible. Also included are chapter exercises and questions, many with illustrations.

The key feature of this workbook is the software. Available for PC-ATs and compatibles and the Macintosh, these disks contain a collection of full-featured commercial-quality simulators for the most important network paradigms. The user interface is graphic and easy to use, and the simulators are consistent across all networks. The simulators can also build and train significantly large networks, allowing users to construct networks on their own with data relevant to their problems.

Volume 1 covers learning, attractor networks, and hierarchical networks (including back-propagation networks). Volume 2 takes up temporal networks (including recurrent networks), self-organizing networks, higher-order networks, and such new directions in neural networks as fuzzy networks and evolutionary networks. Both volumes contain instructions on how to use the workbook, an introduction, appendixes, a table of random numbers, a glossary, a bibliography, and index.

### From reader reviews:

#### **Audrey Rivas:**

This Understanding Neural Networks are usually reliable for you who want to certainly be a successful person, why. The main reason of this Understanding Neural Networks can be one of several great books you must have is definitely giving you more than just simple reading food but feed you with information that perhaps will shock your prior knowledge. This book is usually handy, you can bring it everywhere and whenever your conditions in e-book and printed kinds. Beside that this Understanding Neural Networks giving you an enormous of experience for instance rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day task. So , let's have it and luxuriate in reading.

#### **Taylor Becker:**

Reading can called mind hangout, why? Because while you are reading a book particularly book entitled Understanding Neural Networks the mind will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely might be your mind friends. Imaging every word written in a book then become one contact form conclusion and explanation this maybe you never get previous to. The Understanding Neural Networks giving you yet another experience more than blown away your mind but also giving you useful information for your better life in this era. So now let us demonstrate the relaxing pattern is your body and mind will probably be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary spending spare time activity?

#### **Jack Nguyen:**

Would you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you just dont know the inside because don't ascertain book by its include may doesn't work at this point is difficult job because you are afraid that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer can be Understanding Neural Networks why because the great cover that make you consider with regards to the content will not disappoint a person. The inside or content is definitely fantastic as the outside or maybe cover. Your reading 6th sense will directly guide you to pick up this book.

#### **Adrienne Helms:**

What is your hobby? Have you heard this question when you got scholars? We believe that that query was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. And you know that little person such as reading or as reading through become their hobby. You have to know that reading is very important and book as to be the matter. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You see good news or update regarding something by book. Different categories of books that can you go onto be your object. One of them are these claims Understanding Neural Networks.
