**Assertion-Based Design** Harry D. Foster, Adam C. Krolnik, David J. Lacey
There is much excitement in the design and verification community about assertion-based design. The question is, who should study assertion-based design? The emphatic answer is, both design and verification engineers. What may be unintuitive to many design engineers is that adding assertions to RTL code will actually reduce design time, while better documenting design intent. Every design engineer should read this book! Design engineers that add assertions to their design will not only reduce the time needed to complete a design, they will also reduce the number of interruptions from verification engineers to answer questions about design intent and to address verification suite mistakes. With design assertions in place, the majority of the interruptions from verification engineers will be related to actual design problems and the error feedback provided will be more useful to help identify design flaws. A design engineer who does not add assertions to the RTL code will spend more time with verification engineers explaining the design functionality and intended interface requirements, knowledge that is needed by the verification engineer to complete the job of testing the design.

**From reader reviews:**

**Donna Miller:**

Nowadays reading books be than want or need but also become a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book which improve your knowledge and information. The data you get based on what kind of book you read, if you want send more knowledge just go with schooling books but if you want experience happy read one along with theme for entertaining like comic or novel. The particular Assertion-Based Design is kind of guide which is giving the reader unforeseen experience.

**Adam Whittington:**

Beside this specific Assertion-Based Design in your phone, it could possibly give you a way to get nearer to the new knowledge or data. The information and the knowledge you will got here is fresh through the oven so don't become worry if you feel like an old people live in narrow commune. It is good thing to have Assertion-Based Design because this book offers to you readable information. Do you oftentimes have book but you seldom get what it's about. Oh come on, that would not happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, including treasuring beautiful island. So do you still want to miss that? Find this book and also read it from currently!

**Timothy Parker:**

As we know that book is essential thing to add our know-how for everything. By a guide we can know everything we would like. A book is a range of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This publication Assertion-Based Design was filled about science. Spend your free time to add your knowledge about your scientific research competence. Some people has different feel when they reading a book. If you know how big benefit from a book, you can really feel enjoy to read a reserve. In the modern era like at this point, many ways to get book that you simply wanted.

**Thomas Hall:**

What is your hobby? Have you heard which question when you got college students? We believe that that query was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person similar to reading or as reading become their hobby.
