Model Theory and Modules (London Mathematical Society Lecture Note Series) M. Prest

In recent years the interplay between model theory and other branches of mathematics has led to many deep and intriguing results. In this, the first book on the topic, the theme is the interplay between model theory and the theory of modules. The book is intended to be a self-contained introduction to the subject and introduces the requisite model theory and module theory as it is needed. Dr Prest develops the basic ideas concerning what can be said about modules using the information which may be expressed in a first-order language. Later chapters discuss stability-theoretic aspects of modules, and structure and classification theorems over various types of rings and for certain classes of modules. Both algebraists and logicians will enjoy this account of an area in which algebra and model theory interact in a significant way. The book includes numerous examples and exercises and consequently will make an ideal introduction for graduate students coming to this subject for the first time.

From reader reviews:

Tracey Egan:

Here thing why this specific Model Theory and Modules (London Mathematical Society Lecture Note Series) are different and reputable to be yours. First of all examining a book is good nonetheless it depends in the content of computer which is the content is as delicious as food or not. Model Theory and Modules (London Mathematical Society Lecture Note Series) giving you information deeper as different ways, you can find any book out there but there is no e-book that similar with Model Theory and Modules (London Mathematical Society Lecture Note Series). It gives you thrill studying journey, its open up your own personal eyes about the thing this happened in the world which is might be can be happened around you. You can actually bring everywhere like in playground, café, or even in your technique home by train. Should you be having difficulties in bringing the printed book maybe the form of Model Theory and Modules (London Mathematical Society Lecture Note Series) in e-book can be your substitute.

Geneva Orta:

Do you one of people who can't read gratifying if the sentence chained from the straightway, hold on guys this aren't like that. This Model Theory and Modules (London Mathematical Society Lecture Note Series) book is readable simply by you who hate the straight word style. You will find the facts here are arrange for enjoyable looking at experience without leaving perhaps decrease the knowledge that want to offer to you. The writer regarding Model Theory and Modules (London Mathematical Society Lecture Note Series) content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the articles but it just different as it. So , do you still thinking Model Theory and Modules (London Mathematical Society Lecture Note Series) is not loveable to be your top collection reading book?

Jacqueline Lewis:

The book Model Theory and Modules (London Mathematical Society Lecture Note Series) has a lot of knowledge on it. So when you read this book you can get a lot of advantage. The book was authored by the very famous author. The writer makes some research prior to write this book. This book very easy to read you can get the point easily after reading this book.

Vickie Duke:

As a university student exactly feel bored to be able to reading. If their teacher questioned them to go to the library in order to make summary for some book, they are complained. Just little students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that studying is not important, boring and can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Model Theory and Modules (London Mathematical Society

Lecture Note Series) can make you really feel more interested to read.
