The Romance of Modern Mechanism With Interesting Descriptions in Non-Technical Technical Language of Wonderful, Machinery and Mechanical Devices, and ... Scientific, Instruments, O (Classic Reprint) Archibald Williams

Life was very simple in those days: luxury being unknown, and necessity the factor which guided mans actions at every turn. With infinite labour he ground a flint till it assumed the shape of a rough arrow-head, to be attached to a reed and shot into the heart of some wild beast as soon as he had approached close enough to be certain of his quarry. The meat thus obtained he seasoned with such roots and herbs as nature provided a poor and scanty choice. Presently he discovered that certain grains supported life much better than roots, and he became an agriculturist. But the grain must be ground; so he invented a simple mill a small stone worked by hand over a large one; and when this method proved too tedious he so shaped the stones¹ surfaces that they touched at all points, and added handles by which the upper stone could be revolved. With the discovery of bronze, and, many centuries later, of iron, his workshop equipment rapidly improved. He became an expert boatand house-builder, and multiplied weapons of offence and defence.
