This unique volume of original essays presents in-depth analyses of representative periods, problems, and debates within the long and rich history of Korean philosophy. It provides the reader with a sense of the problems that motivated thinkers within the tradition and the kinds of arguments that characterize their reflections. With contributions from some of the best and most significant contemporary Korean philosophers, this volume marks an important new stage in the Western-language study and appreciation of Korean philosophy. In order for philosophy to be understood and appreciated *as philosophy* it must at some point be presented and evaluated as the human effort to understand problems through a process of careful and sustained analysis and argument. This anthology offers Western readers the first opportunity to meet and engage with traditional Korean Buddhist and Confucian philosophy on these terms.
