Non-Natural Amino Acids, Volume 462 (Methods in Enzymology)

Non-Natural Amino Acids, Volume 462 (Methods in Enzymology)

By combining the tools of organic chemistry with those of physical biochemistry and cell biology, *Non-Natural Amino Acids* aims to provide fundamental insights into how proteins work within the context of complex biological systems of biomedical interest.

The critically acclaimed laboratory standard for 40 years, *Methods in Enzymology* is one of the most highly respected publications in the field of biochemistry. Since 1955, each volume has been eagerly awaited, frequently consulted, and praised by researchers and reviewers alike. With more than 400 volumes published, each *Methods in Enzymology* volume presents material that is relevant in today's labs -- truly an essential publication for researchers in all fields of life sciences.

Demonstrates how the tools and principles of chemistry combined with the molecules and processes of living cells can be combined to create molecules with new properties and functions found neither in nature nor in the test tube

Presents new insights into the molecular mechanisms of complex biological and chemical systems that can be gained by studying the structure and function of non-natural molecules

Provides a "one-stop shop" for tried and tested essential techniques, eliminating the need to wade through untested or unreliable methods
