Geology, Chemical, Physical, and Stratigraphical Volume 2; Stratigraphical and physical Sir Joseph Prestwich

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 Excerpt: ...type, and others are related to the Gavial of the Ganges. The Flora of the Dakota group is considered to be of about the age of the Cenomanian of Europe, as it is analogous to the Flora of that period in Saxony. It consists of above 100 species, of which five are new forms of Ferns, six of Conifers, and the rest angiosperms. The remains are mostly leaves, which occur in a reddish shale and are in a fine state of preservation. They have been described by Lesquereux¹, and are referable, amongst others, to Quercus, Ficus, Platanus, Laurus, Liquidambar, Populus, Salix, Betula, Myrica, Celtis, Sassafras, Diospyros, Azalia, Magnolia, Liriodendron, Paliurus, Rhus, Juglans, Prunus, etc. Many of the genera of the existing arborescent Flora of North America are represented by analogous types. The Cretaceous leaves have, however, generally a thicker coriaceous substance, and greater integrity of the borders. Lesquereux considers that the climatal conditions of temperature under which they flourished were nearly identical with those of the United States in the same latitudes at the present day. Higher in the series, but yet the one passing conformably into the other, is the great Lignitic group of the Upper-Missouri and the Rocky 1 Hayclen's Report, 'Geol. Survey Western Territories' for 1876. Mountain region--a series consisting of shales and sandstones, with marine and fresh-water remains, fucoids, and land plants, and seams of coal,--the whole very similar in general aspect, and almost in magnitude (2000 feet or more), to the coal-bearing strata of the Carboniferous period. The Flora, which has been described in an elaborate Memoir by Lesquereux, consists of about 200 species, and presents an aspect markedly different from that of the Dakota group. We here meet with...
