Chemistry of Fragrant Substances P.J. Teisseire

This publication is a monograph with tutorial and reference qualities, providing an in-depth picture of the chemistry of fragrances. The book contains hundreds of original schemes and formulas (a total of more than 1400) and is the result of years of research. The book is intended for professional chemists doing research and development in the perfume industry, in the cosmetics and toiletry industry. The text is also intended for natural-products chemists and organic chemists, in academic and industrial settings.
