Principles of Neurobiology Liqun Luo

Principles of Neurobiology presents the major concepts of neuroscience with an emphasis on how we know what we know. The text is organized around a series of key experiments to illustrate how scientific progress is made and helps upper-level undergraduate and graduate students discover the relevant primary literature. Written by a single author in a clear and consistent writing style, each topic builds in complexity from electrophysiology to molecular genetics to systems level in a highly integrative approach. Students can fully engage with the content via thematically linked chapters and will be able to read the book in its entirety in a semester-long course. *Principles of Neurobiology* is accompanied by a rich package of online student and instructor resources including animations, journal club suggestions, figures in PowerPoint, and a Question Bank for adopting instructors.

Principles of Neurobiology is additionally supported by the Garland Science Learning System. This homework platform is designed to evaluate and improve student performance and allows instructors to select assignments on specific topics and review the performance of the entire class, as well as individual students, via the instructor dashboard. Students receive immediate feedback on their mastery of the topics, and will be better prepared for lectures and classroom discussions. The user-friendly system provides a convenient way to engage students while assessing progress. Performance data can be used to tailor classroom discussion, activities, and lectures to address students' needs precisely and efficiently. From reader reviews:

Juan Reynolds:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a stroll, shopping, or went to the actual Mall. How about open or even read a book called Principles of Neurobiology? Maybe it is to get best activity for you. You recognize beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with their opinion or you have various other opinion?

Elmer Dooley:

Reading a publication can be one of a lot of task that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people like it. First reading a book will give you a lot of new details. When you read a publication you will get new information because book is one of various ways to share the information or maybe their idea. Second, reading a book will make you more imaginative. When you looking at a book especially fiction book the author will bring one to imagine the story how the characters do it anything. Third, you are able to share your knowledge to other folks. When you read this Principles of Neurobiology, it is possible to tells your family, friends as well as soon about yours reserve. Your knowledge can inspire average, make them reading a reserve.

James Jones:

Is it anyone who having spare time and then spend it whole day through watching television programs or just laying on the bed? Do you need something new? This Principles of Neurobiology can be the answer, oh how comes? The new book you know. You are consequently out of date, spending your time by reading in this brand-new era is common not a geek activity. So what these guides have than the others?

Anthony Muller:

As a university student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or make summary for some e-book, they are complained. Just very little students that has reading's heart or real their passion. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Principles of Neurobiology can make you feel more interested to read.
